

bokeh requirements

1. Get Anaconda:

<https://www.anaconda.com/products/individual#windows>

2. create new environment (eg. bokehDashboard)

```
conda create --name bokehDashboard python=3.7
```

Activate Environment and install packages

```
conda activate bokehDashboard
```

```
conda install bokeh  
conda install scikit-learn  
conda install pandas  
conda install scipy  
conda install tensorflow
```
